

$$45 + 27 = 72$$

$$5 + 7 = 10 + 2$$

$$40 + 20 = 60$$

$$60 + 10 + 2 = 72$$

$$56 + 38 = 94$$

$$6 + 8 = 10 + 4$$

$$50 + 30 = 80$$

$$80 + 10 + 4 = 94$$

$$34 + 29 = 63$$

$$65 + 17 = 82$$

$$43 + 48 = 91$$

$$29 + 23 = 52$$

Hanna has the correct answer.

$$50 + 30 = 80$$

$$6 + 9 = 10 + 5 = 15$$

$$80 + 15 = 95$$

Sol's method has lots of steps so it could be easy to make a mistake if he tried to do this mentally. Hanna's method is more efficient to use when calculating mentally.

$$65 + 15 = 80$$

$$65 + 16 = 81$$

$$65 + 17 = 82$$

$$65 + 18 = 83$$

$$65 + 19 = 84$$
