

Kingsbury Episcopi Primary School Governing Body Diversity Statement

As a school we recognise that diversity of thought, voices and perspectives is essential to good governance and the effective running of any organisation. We regularly collect diversity information from our governors and, depending on current data, can this to:

- target recruitment to address gaps in experience and diversity
- develop and adapt board practices to ensure full participation
- prioritise training and awareness-raising in identified areas
- address potential gaps in understanding through seeking wider advice and perspectives on current and upcoming opportunities, challenges and risks

However, we are unable to publish this information as it would potentially lead to identification of individual members of the governing body.
